

Testimonial Letter

March, 2008

Dear KnowledgePoints,

I would like to take this opportunity to express my sincere appreciation to Ms. Lauren and the KnowledgePoints staff at your Chester Center for the outstanding educational services they have provided over the last three years to my three sons.

Having tested below grade level on the state standardized tests in both reading and math I sought help for my children from your organization. Within a short period of time, KnowledgePoints made learning less intimidating while building confidence and pride in achievement, and helping to bring my son's reading and math grade equivalencies closer to their grade levels.

Because of KnowledgePoints my sons have grown to like challenges in reading and math. Their grades have progressed from failing and/or just barely passing to passing without frustration.

I would also like to thank you for your patience in scheduling my boys around all their extra curricular activities. Without your willingness to be flexible, I would never have been able to make it all work.

I have, and will continue to recommend you to family, friends and acquaintances, as well as teachers seeking part time employment as a tutor.

Thanks again for all your efforts.

Sincerely,

Taria Clayton
